

Wei Lin

Bio: Wei Lin is a PhD researcher at Tongji University. His PhD thesis is aimed at the digital transformation of underground infrastructures.

In 2019, he earned his B.Eng. degree from Tongji University and was awarded Shanghai Outstanding Graduate. During 2023 and 2024, He worked as a visiting PhD researcher at the University of Cambridge for one year.

Research interests: Underground infrastructure; Computer vision; Deep learning; Digital twin; Structural performance

Email: linwei9612@outlook.com

Education

●	Tongji University	PhD in Engineering	03/2021–Present
	Supervisor: Prof. Xiongyao Xie		
●	University of Cambridge	PhD in Engineering (visiting)	04/2023–03/2024
	Supervisor: Dr. Brian Sheil		
●	Tongji University	Master of Engineering	09/2019–02/2021
	Supervisor: Prof. Xiongyao Xie		
●	Tongji University	Bachelor of Engineering	09/2015–07/2019
●	Putian No. 1 Middle School of Fujian Province		09/2012–07/2015

Experience

●	Laboratory Demonstrator	University of Cambridge	10/2023–03/2024
●	Research Intern	Zhejiang Scientific Research Institute of Transport	08/2022
●	Administrative Assistant	Tongji University	09/2019–02/2021
●	Engineering Intern	Shanghai Tunnel Engineering Co., Ltd.	07/2018–08/2018

Honors & Awards

1. GeoShanghai Prize for Service Award, 05/2024
2. China Scholarship Council Scholarship, 07/2022
3. Engineering Construction Science and Technology Progress Award, Second Prize, 12/2021
4. ‘Zhangjiang Guoxin’an Cup’ BIM Modelling Competition, Third Prize, 09/2021
5. Tongji Excellent Student, 01/2021
6. Shanghai Outstanding Graduate, 05/2019
7. Tongji Excellent Student, 01/2019
8. Tongji Scholarship of Excellence, Second Prize, 12/2018
9. Tongji Excellent Student, 03/2018
10. China National Scholarship, 11/2017
11. National Zhou Peiyuan Competition on Mechanics, Second Prize, 06/2017
12. Tongji Scholarship of Excellence, First Prize, 12/2016
13. Xu Aqiong Scholarship, 08/2015

Activities

● **Presentations**

(in English)

1. Semantic segmentation of large-scale segmental lining point clouds using 3D deep learning, GeoShanghai International Conference 2024, Shanghai, 27/05/2024
2. Computer vision for the segmentation of tunnel point clouds: Dataset and network, World Tunnel Congress 2024, Shenzhen, 24/04/2024
3. Understanding tunnel point clouds using 3D deep learning, Norwegian Geotechnical Institute, online, 01/11/2023
4. Refined perception and management of ring-wise deformation for segmental linings using 3D deep learning and BIM, Eighth International Symposium on Life-Cycle Civil Engineering (IALCCE 2023), Milan, 04/07/2023
5. The digital twin of shield tunnels for structural analysis, hyperTunnel, online, 05/05/2023
6. The digital twin of shield tunnels for structural analysis, Mott MacDonald, online, 27/04/2023

(in Chinese)

7. 用于大规模盾构隧道点云自动处理的计算机视觉技术, Shanghai Urban Construction Design and Research Institute (SUCDRI), Shanghai, 22/07/2024

● **Posters**

1. Revealing high-fidelity and present-day geometry of segmental linings by AI, 11th International Symposium of Geotechnical Aspects of Underground Construction in Soft Ground (IS-Macau 2024), Macau, 14–17/06/2024
2. Prediction of settlement induced by tidal fluctuation for underwater shield tunnel during service based on historical monitoring data, 2022 8th International Conference on Hydraulic and Civil Engineering: Deep Space Intelligent Development and Utilization Forum (ICHCE), Xi'an, 25–27/11/2022

● **Reviews**

1. Tunnelling and Underground Space Technology, 5 reviews
2. Underground Space, 7 reviews

Supervision

● **Tom Hill, University of Cambridge, fourth-year project, 2024**

Supervisor: Dr. Brian Sheil

Co-supervisor: Wei Lin

● **Zeyu Wu, Tongji University, Bachelor thesis, 2023**

Research on intelligent early warning technology for parametric construction of deep foundation pit in

soft soil in Shanghai

Supervisor: Prof. Xiongyao Xie

Co-supervisor: Wei Lin
